

Presentation Master SNE

Security and Network Engineering

UvA Open House

OS3 Team

University of Amsterdam

February, 2024

- 1 History & Philosophy
- 2 Curriculum & Organisation
- 3 Courses
- 4 SNE lab facilities
- 5 Intake & Admission
- 6 Staff & Contact

History of SNE

- Master of Science education, started in 2003
- Originally called System and Network Administration
 - In Dutch: “Systeem- en NetwerkBeheer”
- Now called Security and Network Engineering
 - In Dutch: “Security- en NetwerkEngineering”
- Moved to Science Park Amsterdam in 2009
 - Also part-time and international students
- Two focus areas
 - Networking and Security
 - Security includes Forensics

- An interesting mix of bachelor educations
 - Bachelors of Science in Computer Science (“WO”)
 - Bachelors of (Technical) Informatics (Polytechnic (“HBO”))
 - Belonging to the best polytechnic students
- Intake procedure (assessment) is required for all students
- You need to be well motivated

- SNE master with an academic view
 - Abstraction power
 - Scientific knowledge
 - Innovation power
 - Presentation skills
 - Reporting skills
 - Research skills

- Open Technology
- OS3
 - Open Standards
 - Open Software
 - Open Security
- Security is omnipresent
- Technical orientation
- Middle ground between abstract science and professional application

Accreditation

Accreditation by the NVAO

In March 2020 SNE has been visited by an accreditation panel.

“The panel is impressed about the educational concept and the teaching methods of the programme. Students are very intensively guided by lecturers and lab teachers and work together productively. As a result, students manage to acquire knowledge and skills at a very high pace.”

The official report of the NVAO (“Accreditation Organisation of the Netherlands and Flanders”) is available at their site:

<https://www.nvao.net/nl/besluiten/universiteit-van-amsterdam/m-security-and-network-engineering>

Career prospects

- Very good career perspectives
 - Companies are actively scouting for OS3 graduates
 - Almost 100% job guarantee
- Some sectors with many graduates
 - Networking organisations like AMS-IX and SURF
 - Security companies like Fox-IT and Secura
 - Research organisations like UvA and NLnetLabs
 - Government institutes like NCSC
 - Accountancy firms like KPMG and Deloitte
 - Many others

Relevance?

A man in a blue suit stands on a stage to the left of a large projection screen. The screen displays the text "WE ARE NO LONGER SECURING COMPUTERS" in bold, black, sans-serif capital letters. The stage is dark, and the screen is brightly lit. There are some lights visible on the left side of the stage.

**WE ARE NO LONGER
SECURING COMPUTERS**

WE ARE SECURING SOCIETY.

- Total of 10 modules of 6 ECTS each
 - 60 ECTS == 1 year
 - 2 weeks == 3 ECTS
- Semester 1: 8+8+4 weeks
- Semester 2: 8+8+4 weeks
- Full-time or part-time (\equiv full-time in 2 years)

Focus Area: Networking

- Focus on advanced networking
 - In-depth Routing and Switching (OSPF/MPLS/BGP/SR)
 - In-depth network behaviour (**TCP** high bandwidth/high latency)
 - Data plane **programmability** (OpenFlow,P4)
 - Fiber optics
 - **Wireless** technology
- Two **specialistic** courses
 - InterNetworking and Routing
 - Advanced Networking

Focus Area: Security

- Focus on **digital** security, including forensics
 - Gather evidence in a way that will hold up in court
 - How do hackers think?
 - Security of radio-based technologies (GSM, BlueTooth, ZigBee)
 - Security of mobile operating systems
- Four **specialistic** courses
 - Security of Systems and Networks
 - CyberCrime and Forensics
 - Offensive technologies
 - Advanced Security

Focus Area: Foundations and Complexity

- Focus on history, foundational aspects and complexity
 - History of Unix and the Internet
 - Basic Computer Architecture and Operating Systems
 - Basic protocols: DNS, SMTP, HTTP
 - Scaling techniques and Virtualisation
 - Administration and DevOps
- Two **specialistic** courses
 - Classical Internet Applications
 - Foundations of the Internet
 - Large Systems

Semester 1

Month	Part-time year 1	Part-time year 2
Sep	Security of Systems and Networks	Classical Internet
Oct		Applications
Nov	Large Systems	InterNetworking
Dec		and Routing
Jan	Research Project 1	

Semester 2

Month	Part-time year 1	Part-time year 2
Feb	CyberCrime and Forensics	Advanced
Mar		Networking
Apr	Offensive Technologies	Advanced
May		Security
June		Research Project 2

“Theoretical” courses

- 7 weeks (20 hours a week)
 - 2 * 2 hours lectures
 - 2 * 4 hours lab exercises and practical work
 - 1 * 8 hours private study
- 1 week examination

“Project” or “Practical” courses

- Same as theoretical courses, but with a small **project** as part of the practical work
 - Teamwork
 - Communication
 - Presentation

Research Project

- 4 weeks (full-time)
- Individual work (mostly)
 - Week 1: **orientation** and project definition
 - Week 2 and 3: **research**
 - Week 4: **report** writing
 - One day in week 5: **presentation**

The “fifth” day

- Lectures and lab exercises fill 4 full days every week
- The remaining day (mostly **Wednesday**) contains
 - Guest lectures
 - Colloquia
 - Site visits
 - Research preparation
 - Private study

Obligatory presence

- 10:00-16:00 on normal days
- On Wednesdays if there is an organized event
- Research projects: twice 1 month full time.

SNE Trip: E.g. Visit to Bletchley Park

Security of Systems and Networks (SSN)

- Security of Systems and Networks
 - Crypto (traditional and modern)
 - Protocols (TLS, IPsec)
 - Authentication
 - Hacking tools
 - Passwords
- Mini-project included

Classical Internet Applications (CIA)

- Classical Internet Applications
 - History
 - Computer Architecture
 - DNS(SEC)
 - Email
 - Web

Large Systems (LS)

- Large Systems
 - Design
 - Administration
 - Cloud Computing
 - Scaling
 - Automation
 - Change Management

InterNetworking and Routing (INR)

- InterNetworking and Routing
 - Physical and logical structure of the Internet
 - Addressing (IPv4, IPv6)
 - Layer 2 and loop prevention
 - Layer 3 and routing
 - Interior (RIP, OSPF, IS-IS)
 - Exterior (BGP)

CyberCrime and Forensics (CCF)

- Cybercrime and Forensics
 - Reliable gathering of digital information
 - Recovering (partially) destroyed information
 - Timelining
 - Trap avoidance
 - File systems
 - Volatile information capture
- Mini-project included

Advanced Networking (AN)

- Advanced Networking
 - In-depth transport layer (TCP)
 - Software Defined Networking (SDN)
 - Network Function Virtualisation (NFV)
 - Optical technology
 - Wireless technology
 - Carrier grade connectivity
 - Build your own network!

Offensive Technologies (OT)

- Offensive Technologies
 - Sniffing
 - Intrusion detection
 - Hacker mindset
 - Malware
 - Botnets
- Mini-project included

Advanced Security (AS)

- Advanced Security topics
 - Wireless security
 - Mobile security
 - Internet of Things
- Mini-project included

Research Projects

- Research a problem of your own choice
- Examples
 - OV Chipcard
 - Detection of peer-to-peer botnets
 - Smart metering
 - Wireless protocol analysis using GNUradio
 - Industrial-Scale Software Defined Networking
 - Optical Networks using Hollow Fibers

E-passport investigation (The Times)

16

THE TIMES Wednesday August 6 2008

News

Fatal flaw: How a baby became

The supposedly fail-safe system devised to foil terrorists and criminals can be easily turned to their advantage, **Steve Boggan** reports

Jeroen van Beek takes the passport of a 16-month-old British boy and puts it on to a £40 smartcard reader the size of an iPod. He punches a code into his computer and, within seconds, the information contained in the passport's microchip appears on screen.

This is not supposed to happen, as communication between the chip and the reader uses powerful encryption, but a renowned British computer expert called Adam Laurie worked out how to crack the code 18 months ago.

Within seconds, in his university office in Amsterdam, Mr van Beek, 30, copies the contents of the microchip on to another chip, making a clone of the first. He launches some software called Golden Reader Tool — the International Civil Aviation Organisation (ICAO) standard kit for checking biometric passports — and the new

SNE lab facilities

- Three physical, dedicated classrooms at Amsterdam Science Park
- One (large!) server room, also at Science Park
 - It houses our servers & network devices
 - OS3 has its own network connection via SURFnet
 - ...so minimal firewalling etc.
- All students get their own desk, desktop PC, and server
- Use this for lectures, labs, and research projects

Hardware & software at OS3

- Nice mix of open source, multi-vendor, cutting edge, legacy
- You'll work mainly with Unix-like systems
 - Windows/Mac also possible, although not supported by us
 - Nice chance to work with different hardware/software
- Student servers are Dell PowerEdge machines
 - Virtualization (Xen/KVM, containers) to get more out of your server

Application at Studielink/UvA

- Application deadlines 2024:
 - Dutch and EU/EEA students: **June 30** 23:59
 - Non-EU/EEA students: **January 31** 23:59
- Register in Studielink at <https://www.studielink.nl/>
- Receive your UvA-net ID and further instructions by email (check your spam folder)
- Go to www.datanose.nl, log in with your UvA-net ID and upload all necessary documents

Intake exams & interview (1)

- To prepare all students for an intensive one-year MSc program
 - Info at <https://www.os3.nl/info/admission>
- Consists of 5 exams and an interview
 - Admission depends on exam scores & interview
- Exams either in our Amsterdam lab, or online
- Interview is scheduled after passing all exams
- Three opportunities in total (i.e. 2 retakes)

Intake exams & interview (2)

- Exams:
 - TCP/IP (multiple choice, 45 mins)
 - Unix (multiple choice, 45 mins)
 - Mathematics (multiple choice/fill the blanks, 1 hour)
 - Python (programming exercises, 1 hour)
 - Text Analysis (summary & questions, 1.5 hours)
- Intake exam dates: March 27, May 29, July 24
 - Dates differ for international students!

- Director of the education
 - Ana Opreescu
- The Core Team
 - Founder of the education Karst Koymans
 - Security Area coordinator Jaap van Ginkel
 - Lecturers / Lab teachers Arno Bakker, Vincent Breider, Roy Vermeulen
 - System Engineer Niels Sijm
- Other lecturers
 - Paola Grosso, Chrysa Papagianni, Francesco Regazzoni
- Many guest lecturers
